## PROFESSIONAL SUMMARY

Full Stack Developer / Software Engineer with 2+ years of experience designing and maintaining retail and internal business applications using Angular, React, ASP.NET Core Web API, C#, and SQL Server. Proven track record of optimizing database queries, automating store workflows, and delivering clean, maintainable, well-tested code in fast-paced retail environments. Recently expanded skill set into applied AI fundamentals. Seeking to bring strong full stack development capabilities to a growth-focused engineering team.

## WORK EXPERIENCE

### Full Stack Developer — ARCOM

January 2024 – Present

- Developed and maintained retail management systems using Angular, React, and ASP.NET Core Web APIs, supporting day-to-day operations across 10+ store locations.
- Designed and optimized SQL Server databases, including stored procedures and query tuning, reducing average query response time by approximately 30%.
- Automated recurring store workflows, saving an estimated 5+ hours of manual processing per week and minimizing operational errors.
- Collaborated across debugging, QA testing, and deployment stages, contributing to 15+ stable production releases through strong problem-solving and organizational skills.

### Software Engineer (Co-op) — EMART Hail

June 2023 – December 2023

- Built 3+ internal tools with C# and .NET to streamline daily business processes for store staff.
- Improved usability and visual consistency of internal interfaces using HTML, CSS, and JavaScript, reducing reported UI issues.
- Conducted debugging, functional testing, and system analysis to support reliable tool performance.
